

## CENTRIFUGAL SIEVE SHAKERS

The main utility of the centrifugal sieve shakers is to separate different fractions of a material with an important percentage of product.

They are made of stainless steel and can be used for safety sieving to eliminate some product's impurities. This is a suitable application in industrial sectors like feeding or pharmacy with products like plastic, varnish, ceramics, etc.

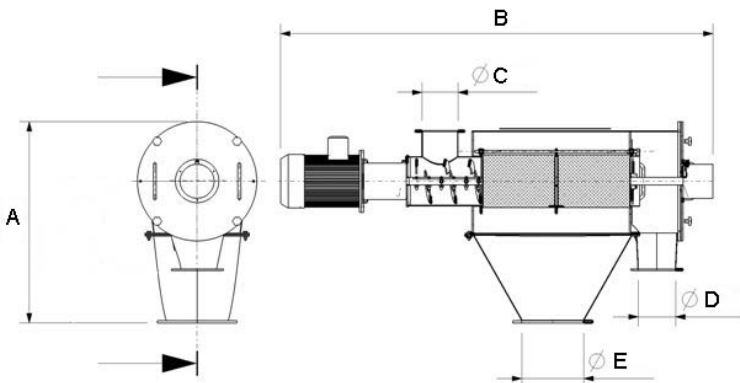

Available models: **FTIC-0650** y **FTIC-0800**.
